

Reconnect — video meetings and webinars

Meet a buyer over video without sending them to another platform — Reconnect runs the room from inside RepBud.

Covers `/dashboard/reconnect` · for rep, dmc

The screenshot shows the RepBud Reconnect dashboard. On the left is a dark green sidebar with various icons. The main content area has a light beige background. At the top, it says 'REPBUD' and 'Reconnect'. Below this, a description states: 'Branded video meetings & webinars with your buyers. Create a room now and share the link; guests join straight from it, no account needed.' A green button labeled 'Meeting settings' is followed by the text '— your name, backgrounds & waiting room →'. Below this is a white box titled 'This month' with a 'First Class' label. It contains three rows: 'Meetings' with a progress bar at '0 / 500 h', 'Webinars' with a progress bar at '0 / 50 h', and 'AI notes' with a progress bar at '0 / 30 h'. A note at the bottom says 'Resets on the 1st. Hosting pauses if a limit is reached.' Below this is another white box with a green button 'Start an instant meeting' and the text 'Opens now with a waiting room — nobody joins until you let them in.' Underneath is a section 'Or schedule a room' with 'Meeting' and 'Webinar' buttons. A description says 'Branded video meeting — everyone on camera together. Up to a small group.' There is a text input for 'Meeting title (optional)'. Below that is a 'When' section with a date/time picker showing 'dd/mm/yyyy, --:--' and a note 'blank = start now'. At the bottom is a 'Length' section with a dropdown set to '30 min' and a green 'Create meeting' button. A small sun icon is in the bottom right corner.

The steps

01 Open Reconnect

Reconnect is branded video meetings and webinars on your own account. Guests join from a link with nothing to install.

02 Start a room now

For a conversation that has to happen this minute, open a room and send the link. It opens with a waiting room, so nobody joins until you let them in.

03 Set the room up as you

Your name, your background and a waiting room, so a buyer arrives somewhere that looks like your company.

04 Or schedule one ahead

Give it a title, a date and a length, and the room waits for the time you set. Blank means start now.

05 Run a webinar

For a training session or a product update, a webinar adds registration, Q&A, polls and breakouts.

06 Share your screen

Screen share, chat and a whiteboard are in the room, so a rate walkthrough does not need a second tool.

07 Reach a room in another language

Live captions and translation across ten languages, for a trade partner who would rather read along.

08 Keep what was said

A recap of the meeting lands in The Lantern for you to approve, so the conversation reaches the contact's record.

09 Watch your allowance

The panel shows the hours used against your plan this month, so a busy show season holds no surprises.

Questions

Does my guest need an account or an app?

No. They open the link and join from their browser — no account, no download.

Which plans include Reconnect?

Business Class and above. The monthly panel shows the meeting and webinar hours your plan carries.

Can I run a webinar rather than a meeting?

Yes. Webinars add a registration page, Q&A, polls and breakout rooms, which is the shape a training session or a product update needs.

Does the meeting reach my CRM records?

Yes. A recap is delivered into The Lantern for you to review, so what was agreed reaches the contact rather than staying in your head.

Can partners book a time themselves?

Yes, through your Meeting Links booking page, which shares your availability and sends the calendar invite and reminders. That is a separate screen — see the Meeting Links guide.
